•HTML,CSS

•Python

•C

•Javascript

•MySQL

Project

Title: Hotel Management System

The Hotel Management System is a desktop application designed to streamline and automate the daily operations of a hotel. The system helps manage room bookings,

customer check-in/check-out, billing, food menu ordering, and payment processes. It provides a user-friendly interface for hotel staff to efficiently handle guest information, track room availability, generate invoices, and maintain records. This project aims to reduce manual work, minimize errors, and improve the overall customer experience.
